## FOREWORD

The **2012 Full Year Official Poverty Statistics** presents the official poverty statistics for 2012 released to the public by the National Statistical Coordination Board (NSCB) on 9 December 2013, in accordance with Executive Order No. 352, *Designation of Statistical Activities that Will Generate Critical Data for Decision-making of the Government and Private Sector*. This report followed the release of the very first set of first semester official poverty statistics for the years 2006, 2009 and 2012 last 23 April 2013, cognizant of the urgent need and demand for more timely statistics.

This publication contains statistical tables on important poverty information such as the food and poverty thresholds, subsistence and poverty incidence and magnitude of subsistence poor and poor. It also includes other useful poverty indicators such as the income gap, poverty gap, and severity of poverty. Back estimates for 2006 and 2009 are also provided as well as for 1991, the benchmark year for the Millennium Development Goals (MDGs). These estimates:

- Adopt the new urban and rural classification in the Family Income and Expenditure Survey (FIES) as defined in the NSCB Resolution No. 9 Series of 2013;
- Use 2006-Based Consumer Price Index (CPI) prices in the computation of the food or subsistence thresholds; and
- Utilize results of the 2000 and 2010 Census of Population and Housing (CPH) for the generation of estimates of families and population in the FIES

The NSCB acknowledges the Technical Committee on Poverty Statistics (TC PovStat) for its valuable inputs and unwavering support in efforts to continuously improve the official poverty estimation methodology. Acknowledgement is likewise given to the following data source agencies, viz., the National Statistics Office (NSO), the Bureau of Agricultural Statistics (BAS), and the Food and Nutrition Research Institute (FNRI). This release is a significant milestone in making statistics on welfare and living standards more timely since as per System of Designated Statistics, the NSO releases the FIES, the basic data source for official poverty statistics, 18 months after the reference year. The NSO released the 2012 FIES full year results, much ahead of the usual schedule. It is hoped that policy and program makers and implementers, researchers, and the general public will find this Report useful.

**JOSE RAMON G. ALBERT**  
Secretary General

## I. Highlights of the 2012 Full Year Official Poverty Statistics

### A. National

#### 1. Main Indicators

For the full year 2012, a family of five will need around PhP 5,513 monthly income to buy their minimum basic food needs; and around PhP 7,890 monthly for their minimum basic food and nonfood needs.

This represents an increase of about 12.3 percent for both the food and poverty thresholds between 2009 and 2012. Such increases represent inflation of about 4.1% on the average per year between 2009 and 2012.

In the same period in 2012, the proportion of Filipino families in extreme poverty whose incomes are not sufficient to meet basic food needs stands at 7.5 percent, which is almost the same in 2009 but the figure in 2012 is significantly lower than the 8.8 percent estimate in 2006.

It is worth noting that despite the rise in the number of families in the country between 2006 and 2012, the estimated number of extremely poor families has remained steady at around 1.61 million.

In terms of the poverty incidence, one out of five Filipino families was estimated to be poor in 2012 (19.7 percent). The estimate for 2012 is slightly lower than the 2009 and 2006 poverty incidence figures, which were estimated at 20.5 and 21.0 percent, respectively, but these differences are not statistically significant.

Although the proportion of poor families has been practically similar between 2006 and 2012, on account of the country's growing population, the estimated number of poor families has risen from 3.8 million in 2006 to 4.2 million in 2012.

## 2. Other Poverty Measures

In addition to the abovementioned indicators, other poverty measures generated by NSCB, which could also be used for designing poverty intervention programs include the income gap, poverty gap and squared poverty gap.

In 2012, the income gap, which measures the amount of income required by the poor in order to get out of poverty in relation to the poverty threshold itself, was estimated at 26.2%. This means that, on the average, a poor family with five members needed a monthly additional income of about Php2,067 to move out of poverty in 2012.

This can serve as a useful reference especially in determining the necessary budget to eradicate poverty in the country. Given this information, the NSCB estimates that if the government were to provide a mere cash transfer to all poor households in terms of what they would require to cross the poverty line, a total of Php124 billion in 2012 would be required to eradicate poverty (exclusive of targeting costs). It may be noted that budget allocated for CCT for the entire year of 2012 is 39.4 billion.

## B. Regional

At the regional level, the regions with the lowest poverty incidence among families in 2006, 2009, and 2012, continue to be NCR, CALABARZON, and Central Luzon. On the other hand, ARMM consistently figured in the bottom (poorest) set of regions with the highest poverty incidence among families between 40.0 to 49.0 percent in 2006, 2009, and 2012. Note that in 2006 and 2009, Zamboanga Region and Caraga were included in the three regions with the highest poverty incidence. While it is worth noting that they did not figure in the bottom cluster in 2012, Eastern Visayas and SOCCSKSARGEN were new entrants in the said group at around 37.0 percent.

While it might seem that there are no changes in poverty conditions across the country between 2009 and 2012, data shows that Caraga improved its poverty incidence significantly from 46.0 percent in 2009 to 31.9 percent in 2012.

### C. Provincial

As far as provincial data is concerned, the group of provinces with the least poverty incidence among families remain practically the same namely, the 4 districts of NCR, Bataan, Benguet, Bulacan, Cavite, Laguna, Pampanga, and Rizal with the addition of Ilocos Norte in the group in 2012.

On the other hand, the provinces which were consistently included in the cluster with the highest poverty incidence among families in 2006, 2009, and 2012 are the following: Eastern Samar, Lanao del Sur, Maguindanao, Masbate, Northern Samar, Sarangani and Zamboanga del Norte. New entrants in the bottom cluster of provinces in 2012 are Camiguin, Lanao del Norte, North Cotabato and Western Samar.

## **II. Summary**

In general, about one out of every five Filipino families (19.7 percent) was poor in 2012. The estimate for 2012 is slightly lower than the 2006 and 2009 poverty incidence figures, which were estimated at 21.0 and 20.5 percent, respectively, but these differences are not statistically significant.

Although the proportion of poor families has been practically similar between 2006 and 2012, on account of the country's growing population, the estimated number of poor families has risen from 3.8 million in 2006 to 4.2 million in 2012.

In terms of subsistence incidence, one out of every ten Filipino families (7.5) had income not enough to meet their basic food needs. This is the same in 2009 but the figure in 2012 is significantly lower than the 8.8 percent estimate in 2006.

However, despite the rise in the number of families in the country between 2006 and 2012, the estimated number of extremely poor families has remained steady at around 1.6 million.

Among the regions, Caraga posted significant reduction in poverty incidence between 2009 and 2012.

## **III. On the Release of Back Estimates for 1991, 2006 and 2009**

In addition to the poverty estimates for 2012, back estimates for 2009, 2006 as well as 1991, the benchmark year for the Millennium Development Goals, were also generated since estimates in this Report:

- Adopt the new urban and rural classification in the Family Income and Expenditure Survey (FIES) as defined in the NSCB Resolution No. 9 Series of 2013;
- Use 2006-Based Consumer Price Index (CPI) prices in the computation of the food or subsistence thresholds; and
- Utilize results of the 2000 and 2010 Census of Population and Housing (CPH) for the generation of estimates of families and population in the FIES

## Glossary of Terms

**Food threshold** - the minimum income required for a family/individual to meet the basic food needs, which satisfies the nutritional requirements for economically necessary and socially desirable physical activities

**Income Gap** - the average income shortfall, expressed in proportion to the poverty threshold, of families/individuals with income below the poverty threshold

Notes: The difference between the income gap and the poverty gap is the use of number of poor families/ individuals as denominator for the income gap. For the poverty gap, the total number of families/individuals is used.

**Poverty gap** - the total income shortfall (expressed in proportion to the poverty threshold) of families/ individuals with income below the poverty threshold, divided by the total number of families/ individuals

**Poverty incidence** - the proportion of families/individuals with per capita income less than the per capita poverty threshold to the total number of families/individuals

**Poverty threshold** - the minimum income required for a family/individual to meet the basic food and non-food requirements

Notes: Basic food requirements are currently based on 100% adequacy for the Recommended Energy and Nutrient Intake (RENI) for protein and energy equivalent to an average of 2000 kilocalories per capita, and 80% adequacy for other nutrients. On the other hand, basic non-food requirements, indirectly estimated by obtaining the ratio of food to total basic expenditures from a reference group of families, cover expenditure on: 1) clothing and footwear; 2) housing; 3) fuel, light, water; 4) maintenance and minor repairs; 5) rental of occupied dwelling units; 6) medical care; 7) education; 8) transportation and communication; 9) non-durable furnishings; 10) household operations; and 11) personal care & effects.

**Severity of poverty** - the total of the squared income shortfall (expressed in proportion to the poverty threshold) of families/ individuals with income below the poverty threshold, divided by the total number of families/ individuals

Notes: This is equal to the Foster-Greer-Thorbecke (FGT) family of measures with  $\alpha = 2$ . It is a poverty measure, which is sensitive to the income distribution among the poor – the worse this distribution is, the more severe poverty is.

**Subsistence incidence** - the proportion of families/individuals with per capita income less than the per capita food threshold to the total number of families/ individuals
